PROFESSIONAL SUMMARY

BSc Computer Science & Information Systems graduate from the University of the Witwatersrand who designs, builds and deploys full-stack web applications with React, Node.js/Express, PostgreSQL (Supabase) and REST APIs, with Azure experience. Skilled at translating business requirements into working software, using Git, Agile practices and automated unit testing. Seeking a Graduate Software Engineer, Full-Stack Developer, or Systems Analyst role.

EDUCATION

BSc Computer Science & Information Systems | University of the Witwatersrand *2022 – July 2026*

- Relevant Coursework: Software Design, Database Fundamentals, Analysis of Algorithms, Operating Systems & System Programming, Computer Networks, Mobile Computing, Information Systems Development Project

National Senior Certificate | Sekgutlong High School *2021*

- Bachelor Pass with 6 Distinctions | Top 2 Academic Achiever (School) | Top 100 in Free State Province

TECHNICAL SKILLS

- Programming Languages: Java, JavaScript, TypeScript, Python, C++, PHP, SQL
- Frontend: React.js, Vite, Tailwind CSS, HTML5, CSS3
- Backend: Node.js, Express.js, REST APIs, JSON, API Integration
- Databases: PostgreSQL (Supabase, Row Level Security), MongoDB, MySQL, Firebase
- Testing & Quality: Vitest, React Testing Library, unit testing, ESLint
- Cloud & DevOps: Microsoft Azure (incl. Cognitive Search), Vercel (continuous deployment), Git, GitHub Actions (CI)
- Software Engineering: System Design, UML Modelling, Requirements Analysis, Agile Development, Data Structures & Algorithms, Object-Oriented Programming

PROJECTS

Sekgutlong School Website & Management System *2026*

GitHub: github.com/Tsiika165/sekgutlong-school-website | Live demo: sekgutlong.vercel.app

- Designed and built a full-stack school management platform with React, Vite and Tailwind CSS, modelled on the administrative and communication needs of a real high school (deployed as a demo)
- Implemented role-based access (admin, staff, pending staff) with Supabase Auth and PostgreSQL Row Level Security policies, so only admins can publish content and approve staff accounts
- Designed a relational PostgreSQL (Supabase) data model for staff, submissions, news, gallery and admissions, with storage rules for media uploads
- Wrote 45 unit tests (Vitest, React Testing Library) covering authentication, role-based access and core UI, run automatically with GitHub Actions CI; deployed on Vercel with continuous deployment from GitHub

Student Results Management System *2026*

GitHub: github.com/Tsiika165/student-results-system

- Designed and implemented REST APIs using Node.js and Express.js, backed by a relational PostgreSQL (Supabase) database, to modernise student records, subjects and grades management
- Built a React frontend enabling real-time data entry, results tracking and reporting, replacing manual spreadsheet-based processes with a structured, database-driven workflow

Constitutional Archive Data Management System *2025*

GitHub: github.com/Heisenburg-z/Constitutional-Archive-Data-Management-and-Search-Interface

- Contributed to a team-built full-stack platform for managing and searching constitutional archives (React, Tailwind CSS, Node.js, Express, MongoDB), deployed on Azure
- Authored requirements specifications and UML diagrams that guided the development team's system design
- Integrated Microsoft Azure Cognitive Search to enable natural language document search and retrieval
- Implemented frontend enhancements and conducted testing to improve search usability and overall functionality

Sales Reporting & Analytics System | Client Project *2025*

Role: Systems Analyst & Developer (Team Project) | Code not publicly available per client request

- Collaborated with the client to gather and analyse requirements for manual sales reporting and commission processes, translating them into a digital system design
- Implemented automated commission calculations from documented business rules, reducing manual computation and improving reporting accuracy
- Designed a relational Supabase (PostgreSQL) database and built interactive dashboards surfacing sales performance, commission trends and business KPIs for management decision-making

PROFESSIONAL EXPERIENCE

Resource Mobilisation Officer | Basotho Student Association, Wits University *Feb 2025 – Nov 2025*

- Coordinated initiatives supporting over 120 students throughout the academic year
- Assisted in organising and executing 6+ society events while collaborating with the executive committee
- Contributed to improvements that helped the association receive the Best Presented Society Award

Mathematics & Physical Sciences Tutor | Private Tutoring *Dec 2022 – Jan 2024*

- Tutored over 40 Grade 12 learners, improving their problem-solving skills and academic performance
- Assisted more than 25 learners with university applications and programme selection

CERTIFICATIONS

- Google AI Essentials Specialization, Google / Coursera (October 2026)

LEADERSHIP & ACHIEVEMENTS

- Shortlisted Candidate, Geekulcha Annual Hackathon (2025)
- Participant, AdaptIT Hackathon (2025)
- Best Achiever, Basotho Student Association (2025)
- Best Academic Achiever, Wits Men’s Residence (2022)
- House Committee Member, Argyle House Student Accommodation (2024)
- Deputy President, Representative Council of Learners (2021)
- Volunteer, Motsielwa Foundation (Community Outreach Programmes)
