PROFESSIONAL SUMMARY

BSc Computer Science & Information Systems graduate from the University of the Witwatersrand with experience designing, building, and deploying full-stack software solutions for academic and client projects. Skilled in React, Node.js, Express.js, PostgreSQL, Microsoft Azure, and systems analysis, with experience translating business requirements into practical software solutions. Seeking a Graduate Software Engineer, Full-Stack Developer, or Systems Analyst role.

EDUCATION

BSc Computer Science & Information Systems | University of the Witwatersrand *2022 – 2026*

- Relevant Coursework: Software Engineering, Advanced Databases, Systems Analysis & Design, Data Structures & Algorithms, Mobile Computing

National Senior Certificate | Sekgutlong High School *2021*

- Bachelor Pass with 6 Distinctions | Top 2 Academic Achiever (School) | Top 100 in Free State Province

TECHNICAL SKILLS

- Programming Languages: Java, JavaScript, TypeScript, Python, C++, PHP, SQL
- Frontend: React.js, Vite, Tailwind CSS, HTML5, CSS3
- Backend: Node.js, Express.js, REST APIs, JSON, API Integration, HTTP/REST Architecture
- Databases: PostgreSQL (Supabase), MongoDB, MySQL, Firebase
- Cloud & DevOps: Microsoft Azure (incl. Cognitive Search), Vercel, Git, GitHub Actions (CI/CD), Deployment Pipelines
- Software Engineering: System Design, UML Modelling, Requirements Analysis, Agile Development, Data Structures & Algorithms, Object-Oriented Programming

PROJECTS

Sales Reporting & Analytics System | Client Project *2025*

Role: Systems Analyst & Developer (Team Project) | Code not publicly available per client request

- Collaborated with the client to gather and analyse business requirements around manual sales reporting and commission processes, translating business needs into a digital system design
- Implemented automated commission calculations based on documented business rules, reducing manual computation and improving reporting accuracy
- Designed relational database architecture using Supabase (PostgreSQL) to support scalable sales and commission data management
- Built interactive dashboards and reporting views surfacing sales performance, commission trends, and business KPIs to support management decision-making
- Delivered a system that improved reporting accuracy and reduced manual administrative effort for the client

Sekgutlong School Website & Management System *2026*

GitHub: https://github.com/Tsiika165/sekgutlong-school-website

Live: https://sekgutlong.vercel.app

- Engineered a full-stack school management platform with React, Vite, and Tailwind CSS to digitise administrative and communication processes for a real high school
- Implemented secure role-based authentication and access control with Supabase Auth, enabling staff to manage students, announcements, and content at appropriate permission levels
- Designed a relational PostgreSQL (Supabase) data model to manage staff, student, and school data relationships, with real-time data access between frontend and database
- Deployed the platform on Vercel with GitHub-integrated CI/CD, ensuring reliable, ongoing updates for a live deployment

Student Results Management System *2026*

GitHub: https://github.com/Tsiika165/student-results-system

- Designed and implemented REST APIs using Node.js and Express.js, backed by a relational PostgreSQL (Supabase) database, to modernise student records, subjects, and grades management
- Built a React frontend enabling real-time data entry, results tracking, and reporting, replacing manual spreadsheet-based processes with a structured, database-driven workflow

Constitutional Archive Data Management System *2025*

GitHub: https://github.com/Heisenburg-z/Constitutional-Archive-Data-Management-and-Search-Interface

- Contributed to a team-built full-stack platform for managing and searching constitutional archives (React, Tailwind CSS, Node.js, Express, MongoDB), deployed live on Azure
- Authored requirements specifications and UML diagrams that guided the development team's system design
- Integrated Microsoft Azure Cognitive Search to enable natural language document search and retrieval
- Implemented frontend enhancements and conducted testing to improve search usability and overall functionality

PROFESSIONAL EXPERIENCE

Resource Mobilisation Officer | Basotho Student Association, Wits University *Feb 2025 – Nov 2025*

- Coordinated initiatives supporting over 120 students throughout the academic year
- Assisted in organising and executing 6+ society events while collaborating with the executive committee
- Contributed to improvements that helped the association receive the Best Presented Society Award

Mathematics & Physical Sciences Tutor | Private Tutoring *Dec 2022 – Jan 2024*

- Tutored over 40 Grade 12 learners, improving their problem-solving skills and academic performance
- Assisted more than 25 learners with university applications and programme selection

LEADERSHIP & ACHIEVEMENTS

- House Committee Member, Argyle House Student Accommodation (2024)
- Deputy President, Representative Council of Learners (2021)
- Volunteer, Motsielwa Foundation (Community Outreach Programmes)
- Organiser, Community Soccer Tournament (2023)
- Shortlisted Candidate, Geekulcha Annual Hackathon (2025)
- Participant, AdaptIT Hackathon (2025)
- Best Achiever, Basotho Student Association (2025)
- Best Academic Achiever, Wits Men's Residence (2022)
- Top 100 Matriculant, Free State Province (2021)
- Top 2 Academic Achiever, Sekgutlong High School (2021)
- Top 5 Achiever, Kutlwanong Centre for Maths, Science & Technology (2021)
- 2nd Place, Free State Mathematics Competition (2019)
